

# Rejoignez-nous !

With its many roles, Icam engineering school sets itself apart in the French higher education landscape.

Our courses, be they for universal engineering or professional training, enable each student to experience openness to others and the world with respect for every person's differences.

Through our research projects, R&D activities and courses, we develop strong partnerships with companies.

We have 6 campuses in France, 5 outside France (Central Africa, India and Brazil) and our expansion is always focused on the fulfilment of the people who move businesses forward in their countries, taking into consideration the local culture.

## Vos missions :

We are offering an opportunity in the Higher Education and Research Department on our Nantes campus.

Focused on teaching innovations, practical experiments (FabLabs, workshops, internships, etc.) and course internationalisation, the Higher Education and Research Department is where the personal initiatives and creativity of our employees come together.

At the service of a teaching approach that puts students at the heart of the learning process, it helps them learn the technical expertise and cultural skills that are essential for their life project.

## Votre profil :

With a degree (Bac+5) from an engineering school or university specialising in metallurgy, corrosion and/or ceramics, you will be teaching your speciality subject to French and international students in English.

Passionate and a keen educator open to active teaching methods, you love sharing your knowledge and helping your students to progress.

Working in a team of assistant teachers and researchers, you will be a creative force helping to move teaching methods forwards.

You will propose, plan and write lessons and teaching activities. You will participate in writing and

standardising course content and assessments. Your expertise in your field will be put to use in degree work placements and research (20% of your workload).

Independent and methodical, you have excellent people skills for working in a team and within the network of teaching teams at Icam sites in France and around the world. You are curious and creative with high standards and a precise approach. Your enthusiasm and keen appetite for human relations will be a clear advantage in this role.

Do you match this job profile? Please send your CV and cover letter to the following email address: [gwenola.kerglonou@icam.fr](mailto:gwenola.kerglonou@icam.fr).

Your application will be examined closely.
